GLOBALG.A.P. - QMS MANAGER - MODULI 1+2

Online course

From 14/09/2023 to 19/09/2023 - 16h

Course description

With the publication of version 6 of the GlobalG.A.P standard, the figure of the "QMS MANAGER" was defined, destined to deal with the definition, implementation and maintenance of the GlobalGAP management system within the Groups of certified producers (or in the process of being certified) according to version 6 of the Standard.

The Standard itself has defined the minimum qualification requirements for the QMS Manager. The contents of the course therefore meet these requirements.

For those who have already acquired a part of the contents of this course, it is possible to register for the single day whose contents are still to be faced.

In particular,

- those who have already attended a course for quality system assessors pursuant to ISO 19011:2018 recognized by an ISO 17024 certified body (lasting 16 hours) can register for the single day concerning the Globalgap v6 Standard;
- those who have already attended a course on the GlobalGAP v6 Standard (lasting a minimum of 8 hours) can register for the single day concerning audit techniques according to ISO 19011:2018
