Always available h24 - Immediate activation - 3h

ATTENTION</br>

To access this course you must have completed the eIDAS FOUNDATION course.

Course description

The eIDAS (electronic Identity and Authentication Services) Regulation has taken on a fundamental role in the

digital landscape of the European Union, introducing a harmonized regulatory framework for digital identity and trust services.

The
INTERMEDIATE
module, which must be followed after the
FOUNDATION
module, addresses the topic of trust services, specifically examining the following services:

- Electronic signature, electronic seals, website authentication
- Identity Proofing process and remote signature services
- Timestamping
- Signature and seal validation services
- Long-term preservation services for signatures and seals
- SPID
- e-delivery
